PRODUCTS FOR SILK PROCESSING

SOAKING

LISSOFIL SPECIAL AMK/20
A traditional oil for silk soaking, it has been widely used over decades for fine high quality, trame and organzine yarns.

SETOL RE
New ecological and biodegradable oil, the result of our first and primarily study in the silk sector. The lubricating, softening, antistatic and hygroscopic properties give to the yarn the best performances during the whole silk processing.

FUGITIVE TINTS
Available the following colours: orange, blue, sky-blue, yellow, gold yellow, grey, brown, red, cyclamen.

CONING

VL4
High lubricating and wetting anti-splash coning oil, does not interfere with the electronic devices on the coning machines.

VL2 CS
Ecological and biodegradable coning oil with highest lubricating and antistatic effects.

DEGUMMING

DETERSILK 977
A new Desizing agent for silk and dyeing pre-treatment.

DETERSILK HT
Desizing and degumming agent in high temperature conditions.

MARSEILLE SOAP
Natural olive oil soap always considered the best product for silk degumming. It is also available in liquid formulation.

DETERJET SETA
Synthetic soap to use together with Marseille soap to reduce the degumming time.

FINISHING

FINISH SE
Silicone emulsion, gives to the silk yarn or fabric brightness and soft hand.

FIBROSOL SE
Special esters emulsion with a balance of antistatic and lubricating / softening properties.

SPUN SILK

SETOL SPUN SILK
Silicon free formulation with dispersing, wetting, softening and antistatic properties to use before fibers opening and carding.

ANTISTATICO S10
Antistatic and hygroscopic agent particularly suitable for spun silk process.
